Door Preparation

• All doors should be properly reinforced for lock support. If support is not provided, contact door manufacturer.
• For all metal door preparations use template A4375, EXCEPT for functions 10G70 or 10G71 which uses template 4409 (provided), or functions 10U93, 10U94 and 10U94-2 which require template A4375.
• For all wood door preparations use template A6719, EXCEPT for functions 10G70 & 10G71 which uses template 4409 (provided), or functions 10U93, 10U94 and 10U94-2 which requires template A4375.
• Template information is available on our website, www@sargentlock.com.

- Mark and Drill Holes
  • Fold template onto high edge of door bevel
  • Backset must match lock (2-3/8” or 2-3/4”)
  • 38” from Finished Floor

- Final Door Prep
  • 1” (25mm) hole
  • 2-1/4” (57mm) hole
  • 7/16” (11mm) hole

- Frame Prep for Strike
  • Centerline of latch front and strike
  • Screws (2) #8-32 x 3/4”

Tools
#2 Phillips screwdriver
Push pin (provided)
7/16” drill bit
1/8” drill bit
2-1/8” bore
1” bore

Parts
1. Inside lever
2. Scalp (2)
3. Screws – mounting plate (2) #6 x 3/4” self-tapping
4. Spacer bushing (2)
5. Inside rose assembly
6. Screws – through-bolt (2) #10-32 x 1-1/4”
7. Lockbody
8. Outside rose assembly
9. Cylinder spacer
10. Cylinder
11. Outside lever
12. Key
13. Push pin
14. Latch
15. Screws – latch & strike (4) #8-32 x 3/4”
16. Strike
17. Strike box

* Used with 68 Function only
1. **Latch Installation**
   - **Install loosely; tighten after step #3**
   - Screws (2)
     - #8-32 x 3/4"

   Please note: Doors without a beveled edge need to be adjusted to center the latch - adjust per step 2A.

2. **Preset Lock**
   - **Through-bolt Location** – 12 and 6 o’clock
   - **Door Thickness** – 1-3/4” thick
   - See Step 2A for other door conditions

   ![Diagram of Preset Lock](image)

   

2A. **Through-bolt and door thickness adjustment other than preset**

   - **Remove** – outside lever (usually keyed), scalp and spacer bushing
   - **Rotate** – mounting plate to either align with through-bolt holes in door or adjust for proper door thicknesses (see markings on through-bolt)
   - **Reinstall** – spacer bushing (to align with back of lever), scalp and lever

   ![Diagram of Through-bolt and Door Thickness Adjustment](image)

3. **Test for proper operation before closing door**

   - Screws (2)
     - 10-32 x 1-1/4"
     - #6 x 3/4"

   Scalp to be removed with flat bladed screwdriver at notch
## Lever and Cylinder Removal

### Standard Cylinder

- **Rotate key 45°** and hold
- **Depress lever retainer** with push pin tool

### Interchangeable and Removable Core Cylinder

- **Remove cylinder and tailpiece, using control key (stamped “C”)**
- **Insert Phillips #2 screw driver into cylinder opening making contact with lever retainer.**
- **Pull lever retainer horizontally towards door hinge and remove lever.**

*Note- 1 Bitted cylinders utilize a control key cut 113511*

---

## Standard Cylinder Installation

**IMPORTANT:**

Before cylinder installation 10G16, 10G30, 10G37, 10G38 and 10G54 functions lock, must be timed/preset by rotating cam (within the lever support tube) completely counterclockwise.

- **Remove tailpiece from construction core and insert into new cylinder**
- **Install Cylinder**

Insert cylinder with control key (stamped “C”) into lever; rotate 15 degrees and remove key

---

## Interchangeable or Removable Core Installation

- **Remove construction core or plastic core**
  - If keyed – use Control Key (stamped “C”) rotate 15 degrees and pull

Remove 10G13

- Remove inside (non-rigid) lever with standard push pin
- Insert long push pin into inside lockbody tube and push to release spring loaded lever catch plug assembly for the outside lever
- Remove the outside lever with lever catch plug assembly attached

Install 10G70 & 10G71

- Power Required: 24Volt DC, .25 amps, wiring information provided
- Wires must be protected from abrasion
- Important- See correct door template 4409 provided or on the website at www@sargentlock.com.

Function Description:

10G70 Fail Secure
Power OFF unlocks outside lever
Power ON locks outside lever
Key retracts latch at all times

10G71 Fail Secure
Power ON unlocks outside lever
Power OFF locks outside lever
Key retracts latch at all times

Install 10U93

- Screws (2) 1/4 x 20
- Cup washer
- 2 holes to align with 2 tabs on rose
- Screws (2) #6 x 3/4"
- Scalp to be removed with flat bladed screwdriver

Install 10U94/10U94-2

- Scalp to be removed with flat bladed screwdriver
- 2 holes to align with 2 tabs on rose
- Screws (2) 10-32 x 1-1/4"
- Screws (2) #6 x 3/4"
- Rose
- Tab
